Professional Summary

Offensive security professional with a **Master's** in Information Security, **eJPT certification**, and active participation in **competitive CTF** environments including the Bitdefender Cybersecurity Grand Prix. Skilled in web application exploitation, reverse engineering, network penetration, and forensics. Proficient in Python, Bash, and security tooling (Burp Suite, Metasploit, Wireshark, IDA). Top 5% on TryHackMe globally. Currently pursuing OSCP. Fluent in English (C1). Seeking an Ethical Hacking role to apply hands-on offensive skills in a professional red-team environment.

Technical Skills

- **Penetration Testing:** Web application exploitation, privilege escalation, network attacks, MITRE ATT&CK framework awareness
- **Security Tools:** Burp Suite, Metasploit, Nmap, Wireshark, Hydra, John the Ripper, IDA (reverse engineering)
- **Scripting & Automation:** Python, JavaScript, Bash
- **Operating Systems:** Kali Linux, Ubuntu/Linux, Windows
- **Exploitation Areas:** Web (OWASP Top 10), DNS hijacking, forensics, binary reverse engineering, network exploitation
- **Cloud:** AWS, Azure & GCP fundamentals (ICCA certified), familiarity with cloud attack surfaces
- **Languages:** Romanian (Native), English (C1), French (B2)

Experience

Senior Product Compliance Associate, Amazon

11/2024 - Current

- Applied structured analytical methodology to investigate safety incidents and identify exploitation patterns across thousands of product listings
- Developed Tampermonkey (JavaScript) automation scripts deployed in production, demonstrating ability to build tooling to support security testing processes
- Enforced EU regulatory compliance frameworks (GDPR, product safety directives), developing strong documentation and reporting capabilities
- Led team coordination, cross-functional stakeholder communication, and mentorship

Education

Master's, Information Security (EN)	Alexandru Ioan Cuza University	09/2023 -07/2025
Bachelor's, Business Administration (EN)	Alexandru Ioan Cuza University	09/2020 -07/2023

Certifications

- INE Junior Penetration Tester (**eJPT**)
- INE Certified Cloud Associate (**ICCA**)
- Cambridge English **C1**
- **OSCP** (Offensive Security Certified Professional) - **actively pursuing**

CTF & Competitive Security

Bitdefender Cybersecurity Grand Prix 2025

Competed against professional and student security researchers in Romania's most recognised cybersecurity competition. Disciplines: reverse engineering, web application exploitation, forensics, and coding challenges.

TryHackMe — Top 5% Global ([Glitch21](#))

Competed against professional and student security researchers in Romania's most recognised cybersecurity competition. Disciplines: reverse engineering, web application exploitation, forensics, and coding challenges.

INE CTF Arena Round 8

Competed in network security, common vulnerability exploitation, pentesting and privilege escalation categories.

Security Projects

- [DNS Spoofing](#) (Kali Linux) - June 2024

Executed DNS hijacking attacks in a controlled environment using Kali Linux tools, successfully redirecting traffic to a custom Apache server. Documented how DNS hijacking is used as an entry point for malware delivery and C2 channel establishment.

- [Email Spam Filter](#) (Python ML Classifier) - February 2025

Built a Naïve Bayes / TF-IDF classifier trained on real-world data, demonstrating applied scripting and data handling skills

- [Password Manager](#) (Python) - September 2024

Secure password management tool with generation, clipboard copying, and recovery mechanism — demonstrates applied cryptographic thinking in code.

- [Security Writeup Portfolio](#) - 2025 Ongoing

Published technical CTF and TryHackMe writeups that cover web exploitation, forensics, reverse engineering, and network challenges.

Additional

- Actively practicing on HackTheBox and TryHackMe platforms with documented writeup outputs
- Familiar with OWASP Top 10, MITRE ATT&CK, and common CVE exploitation patterns
- Strong report writing and technical documentation skills in English
